'a prediction'

The USA wants civil unrest. The thorough police militarisation is a tool for mass killing and mass domination of the world.

*It has already started.*

*The FEMA Camps are there and open*

*Plans have already had 2 rehearsals by th US Government*

OUR LEGAL AND MORAL RIGHTS ARE BEING ERODED BY GOVERNMENTS WHO SEE US AS

*The government doesn't give a fuck.*

*It's about control. power and wealth.*

## John's comments on whistleblowers

I have huge amounts of respect for these guys and any others who reveal the truth - the

awful truth, about what our governments and corporations are doing around the world and the wrong doing and illegal acts, the murder and mayhem caused by their actions, and when exposed, they turn on the whistleblower and use all sorts of spin and lies and misinformation to damn and destroy in the face of the public, the very person who is trying to expose these outrageous acts that we - the public - would / are outraged about;- when it is the government who should be hiding its head in utter and complete shame.

Good for these guys and I sincerely hope Edward Snowden gets away from the US trying to track him down and that Bradley Manning gets his action heard by the masses and gets the correct reward he deserves and not the outrageous and disgusting treatment the USA has meted out to him so far.

A democracy - when talking about the United States of America, this is not a word we think of. This nation of bullies, even of its own people, will kill, murder, destroy and plunder anyone and anything to get exactly what it wants and it thinks NOTHING AT ALL ABOUT MURDERING ITS OWN PEOPLE - INNOCENT PEOPLE and hunt those it claims are guilty of espionage even when the wrong doing is at the hands of the government and NOT the whistleblower who simply told the world what is going on behind their backs.

**I ABSOLUTELY SALUTE THESE MEN & WOMEN & OTHERS LIKE THEM**

My door will always be open for them.

ABSOLUTE HEROES

## Remember who 'YOU' are©

By Christopher Charles

*(One of my neighbours here at Hamilton Hall)*

&quot;Have you ever though there might be more to life?  
Have you ever thought of the trouble and strife?  
Have you ever thought you don't need a wife?  
in this system that tells YOU what is right.

Have you ever thought that black could be white  
Have you ever wanted dark to be light  
Have you ever wished that wrong was right  
to stop the arguing and end the fight.

Well yes.....guess what..? You're not alone  
cos a mate'o'mine just heard on the phone  
that an awakening is happening on this planet...your home.  
Its such a good reason to have a moan

So put pen to paper and air your views  
make a banner and get on the news,  
have regular meetings...invite your crews  
for this is the awakening...you know what to do

For this has been predicted through space and time  
that the people will end up...not towing the line  
and without the state...we'll be just fine  
from the 1% and their hidden crimes.

The banks are corrupt  
The leaders out of touch  
The BBC is weird  
and the planets burning up.

So we vote a change...cos we think it matters  
we get a different group of mad hatters  
or ask for new laws to cover the doors  
of the apparent cause, to all the flaws

.

The government will not like us  
on the streets with loud hailers and banners

we shout &quot;*make some new laws for these cheating scammers*&quot;  
but we don't realise we are voting for laws that will hit us as well...like a row of angry  
hammers.

'Cos we all want change...but asking's not right  
We must spread our wings if we really want flight  
and not get caught up in their two party fight  
Make up your own mind...don't believe the hype

You cant stop wars by bombing for peace  
That's like trying to fuck for virginity at least  
and when we ask for laws on hateful speech  
we take away the freedom of each

So stop being offended of what people say  
Its only because YOU hear it that way  
Sticks and stones and come what may  
Support freedom of speech everyday

So how do we make a new world for the better  
I'll tell ya....I'll go through it letter for letter

Turn off your tellys and put on your wellies  
'cos growing your own food is where its at.

Remove the fluoride from your diet  
Its only there to keep you quiet

Get to know your neighbours and others around  
and you'll soon find ...they're all quite sound.

Recognise the difference between statute and law  
and the word UNDERSTAND.....it means much more.

For the acts are not real...they come from the sea  
they were not meant for you and me.  
It's all maritime law....it's corporate rules  
and I'm sorry to say ...we have all been fooled.  
There are very few laws for women and men  
no harm....no loss...no damage...that's them  
It's just a game...the game of life  
you count yourself in when you use the dice,  
and the dice is your name.....  
I'm watching you frown  
For your names property of the Crown

and watch the 6 minute video to the very end

THIS IS ABOUT YOUR FUTURE AND YOUR

PRIVACY AND SECURITY FROM THE STATE

It all sounds so innocent and so ' for your benefit'

but the sad truth is so very dangerous and different

to what they claim

It states that this could be sold to companies and corporate bodies

who have absolutely no right, as far as I am concerned,

spying on people. That is not for national security -

that is not for the protection of the masses -

that is all about control.
